Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments:

Claim 1 was discussed specifically with respect to the organization and function of query "lookup tables" mentioned in the Memmott et al reference, as compared with the "query lookup table" recited in the present invention. The attorney discussed his views as to how the teachings of Memmott et al did not satisfy the function of the "query lookup table" of claim 1. The examiner pointed out his interpretation of the lookup tables, indexed by the query characteristics, as taught by Memmott et al. In addition, the examiner made references to Jammes et al (column 16, lines 42-49), with respect to "submitting queries" and "receiving query results", and made another reference to Jammes et al (figure 3), illustrating SQL query [312], in communication with the lookup table [310], via the store management control [306], as teaching of "query lookup table" of the present invention. In conclusion, the status of the "finally rejected" claims is maintained by the examiner.
